Experience

Full Stack Software Engineer (Contractor), Ernst & Young (EY) – Dallas, TX Oct 2025 – Present

- Delivered full-stack functionality for enterprise applications using Java/Spring Boot, Angular, and AWS.
- Integrated RESTful services with relational databases to support core business workflows and data-driven features.
- Crafted responsive frontend components and dashboards to present complex information in an intuitive format.
- Deployed and supported cloud-based services on AWS, adhering to security, scalability, and reliability best practices.
- Investigated and resolved application defects by debugging backend services and frontend components.
- Collaborated within Agile teams to deliver production-ready code through sprint planning, code reviews and iterative defect resolution.

IT Support Specialist, Empyreal Group – San Jose, CA Mar 2021 – Oct 2025

- Created internal tools to streamline operational workflows, improving efficiency and day-to-day productivity.
- Diagnosed and resolved end-user hardware and software issues through phone and email support.
- Tracked and prioritized incidents using a ticketing system to meet service-level expectations.
- Assisted with system setup, configuration, and software installations for new and existing users, ensuring consistent environments.

Projects

Financial Simulation & Analytics Platform

- Architected the portfolio analytics module of a stock trading simulation platform, providing real-time insights into value, cash, gains/losses, and holdings performance.
- Designed backend APIs and database models with Spring Boot and MySQL to support historical performance tracking and position-level analysis.
- Encoded business rules to manage active simulations and portfolio state transitions.
- Produced interactive dashboards and data visualizations using Angular and TypeScript to analyze trends, top movers, and top positions.
- Worked with backend, frontend, and data-focused teammates to integrate analytics workflows across the platform.

Cloud-Based Hotel Booking Platform

- Implemented secure authentication and access control using JWT and OAuth2 SSO with Google and Okta.
- Engineered backend Spring Boot APIs, deployed on AWS, to manage user roles, sessions, and protected application routes.
- Integrated React UI components with secure APIs to maintain session-aware, authenticated user experiences.

Daily Leaf | iOS App (App Store)

- Published a native iOS application delivering daily motivational quotes with a clean, user-focused interface.
- Implemented core functionality in Swift using SwiftUI and MVVM, managing app lifecycle and local persistence.
- Integrated iOS UserNotifications to deliver daily content and manage scheduled reminders.

Certifications

AWS Certified Solutions Architect - Associate (SAA) Issued 2026

AWS Certified Cloud Practitioner (CCP) Issued 2025

Skills

Languages: Python, Java, SQL, Swift

Frameworks: Spring Boot, Angular, SwiftUI

Tools & Platforms: AWS, REST APIs, Git

Education

California State University, Monterey Bay – B.S. Computer Science

May 2022
